BYOD iPad Classes for 2017

An exciting learning opportunity for students in Years 2, 3, 4, 5 & 6
Rationale –
Our BYO iPad Program will:

- provide an engaging, interactive learning environment.
- ensure contemporary learning in classrooms.
- best facilitate the development of knowledge and skills necessary for the 21\textsuperscript{st} century workforce.
- give parents the opportunity to see what their child is learning every day.
Our beliefs – iPads are learning tools that:

- exponentially enhance a student's learning engagement and motivation to learn when delivering the National Curriculum (ACARA).

- enable: rich, personalised, high-order, collaborative and creative learning experiences; optimal learning outcomes when used as an individual device and not shared; and a variety of learning activities such as drill and repetition, reference, productivity and creativity.

- are not intended to be used for the majority of any school day nor for the majority of teaching within a specific key learning area.

Note: Parents will still be expected to purchase the same booklist as non-iPad classes.
Advantages of using iPads:

- instant access to a wealth of information through wireless connectivity
- increased productivity
- access to rich media – digital stories, images & video
- enable personalised learning for students – targeted work at the correct level for students
- high student engagement – independently & collaboratively
Our beliefs – BYO iPad Program is based on:

- Strong pedagogy and quality learning outcomes.
- The explicit teaching of how to use iPads safely, ethically and responsibly.
- The 5Cs of ICT in Learning framework which aligns with Eatons Hill State School’s Teaching and Learning framework and the Australian Curriculum (ACARA).

iPads as learning tools = effective teaching practice, engaged learners, interesting classrooms
How the BYO iPad Program aligns with the Australian Curriculum (ACARA):

General capabilities are a key dimension of the Australian Curriculum. They encompass knowledge, skills, and behaviours that will assist students to live and work successfully in the twenty-first century. Our program aligns with the following general capabilities:

- ICT Capabilities
- Literacy
- Numeracy
- Critical & Creative Thinking
Program Misconceptions:

- Students can use their iPads during lunch breaks and access Home apps
- Students can play games they download from home
- iPad Classes don’t do any bookwork
- Handwriting is no longer taught in iPad classes
- iPads are used for 100% of the school day
- iPad classes follow a different curriculum and do different assessment tasks
- Students in non-iPad classes are disadvantaged
