SECURITY AND ACCESS

A school wide security system is installed at the school, and is connected to the State Government Protection Service headquarters in Brisbane. Accessing any of the buildings outside of normal hours will activate alarms, and trigger a response from security officers and/or police officers. Persons authorized to enter the school buildings are issued with access codes to permit them to operate the security system.

To minimize damage to school property out of school hours, surveillance cameras monitor various sites around the buildings and grounds and record all activity within these areas. Students are discouraged from lingering in the school grounds after they have been dismissed for the day. Parents/carers are asked to actively discourage children from playing in the school grounds after school and on weekends.

Anyone seeing suspicious activity in the school grounds after hours is encouraged to contact School Watch (13 1788), Albany Creek Police Station (3264 0599) or State Government Security (3224 6666)
